Global health Policies and the actors on the global arena	5
Administration, Management, Leadership and Professional Development	5

Master's Thesis (30 ECTS)

The master's thesis is an individual piece of work in the form of an empirical research and development project. The student shows her capability of systematically performing a study with a possible practical problem as a starting point. This practical problem is then formulated as a research problem and is solved by a specific purpose with possible related research questions. The student is able to use relevant existing knowledge of the studied phenomena and can create a structural and logic theoretical framework for the study. The student can decide to conduct the master's thesis with a commissioner, for example the employer.

The study module consists of the following studies

Master Thesis and research seminars 30
